

## **MEPCO Introduces the Sentinel® Boiler Feed Pumps**

For Immediate Release – January 2014

Grand Rapids, MI – MEPCO announces introduction of our new Sentinel® Boiler Feed Pump Line. Sentinel® Boiler Feed Pumps are designed for installations where it is critical to maintain boiler water levels within narrow limits and automatically provide make-up water from an outside source. Typical applications for the Sentinel® Boiler Feed Pump are use in a gravity return comfort heating system, low pressure boilers, or in low pressure process equipment.

Attached you will find a new cut sheet and update price sheet. The cut sheet will also be available on our website. You can place your orders immediately. As always if you have any questions please contact customer service.
