

MEPCO Introduces Thermostatic Radiator Valves

January 3, 2013

Grand Rapids, Michigan – MEPCO is pleased to announce the re-introduction of our thermostatic radiator valves. MEPCO thermostatic valves and associated actuators offer the specifier, installer, and owner the best features necessary to achieve accurate and efficient room temperature control of hydronic and steam heating systems.

The cut sheet is available on our website. You can place your orders immediately. As always, if you have any questions, please contact customer service.
