

MEPCO Offers New Line of Float and Thermostatic Repair Kits

February 21, 2012

Grand Rapids, Michigan – MEPCO is announcing the addition of a new line of repair kits for all major float and thermostatic manufacturers. If you attended the 2012 ASHRAE show in Chicago and visited our booth, you probably saw our new cut sheet and some of the new products on display.

You can now get repair kits for most makes and models that need servicing. Our kits allow for easy replacement without the costly re-piping typically associated with replacing float and thermostatic traps.

Attached you will find a new cut sheet. The same information is also available on our website. You can place your orders immediately! As always, if you have any questions, please contact customer service.

Ed Gilde

Float & Thermostatic Trap Repair Kits for All Common F&T's

APPLICATION

MEPCO F&T Repair Kits give the end user the ability to completely renew their existing F&T Traps without costly re-piping typically associated with steam trap replacement. These Float and Thermostatic Traps are found on steam heating systems and process applications where discharge of large quantities of air is required for start -up and then immediate purging of condensate as it is generated.

Features and Benefits

- 1.) Simple rugged construction. Where applicable the MEPCO repair kit includes a complete factory assembled and tested head assembly (trap less body). The cast iron head and corrosion resistant valve parts insure longevity.
- 2.) All kits include a sensitive thermostatic element that has been calibrated under high vacuum and steam to discharge air on start up and close tightly to prevent any live steam loss.
- 3.) There is an instant discharge of condensate when it is present. The float operated and water sealed valve mechanism provides immediate discharge as condensate forms with no sub-cooling required.
- 4.) All kits are designed to duplicate the original manufactures specifications and meet Federal Spec WWT-696.
- 5.) Manufactured in the U.S.A.

Materials

Part	Description
Head	Cast Iron ASTM-A278
Seat	Stainless Steel/Brass
Plug	Stainless Steel
Float	Stainless Steel
Gasket	Non Asbestos
