

## **MEPCO Introducing New Line of High Capacity Float & Thermostatic Traps**

For Immediate Release – October 16, 2014

Grand Rapids, MI – MEPCO announces the launch of a new 20-series of High Capacity Float & Thermostatic Traps. The new High Capacity traps are feature heavy duty construction, offer instantaneous valve action, have a water sealed valve, handle high air capacity, are not affected by sudden pressure changes, will operate against back pressure, and are energy efficient and cost effective.

Attached you will find a new cut sheet for the High Capacity Float and Thermostatic Traps; the sheet is also available on our website. You can place your orders immediately. As always, if you have any questions please contact customer service.
